# Add Calendar Events Straight from Text Messages

With iOS 6, sending a phone number via text message would create a link which you could then select and save directly from there. Now, iOS 7 has added to this feature by adding calendar links to dates and keywords such as tonight and tomorrow.

There are Timestamps on Text Messages

If you want to check the time someone sent you a text message, or the the time you sent someone a text message, **swipe from right to left on the screen to check out the timestamps**.

Spotlight Is Easier & Faster to Access

If you've noticed, Spotlight on the furthest left of the Home screen is now gone.
Now you can open Spotlight search in iOS 7 by swiping down from anywhere
on any Home screen.

And it works just like Spotlight worked before, only it's more accessible.

You Can Change Siri's Voice to Male

Tired of Siri's feminine voice? You can change Siri's voice from female to male
in iOS 7 now.

Just go to **Settings** -> **General** -> **Siri** -> **Voice Gender**.
