

www.Classtools.net

Class Tools is a really cool website that offers easy tools to make an instructor's life easier. Some of the items you can create on this website are:

- **Use a countdown timer that displays on your computer and rings when the timer has gone off**
- **Random Name spinner (see example below) This is a great way to ensure that everyone gets called on in class**
- **Crossword generator**
- **QR Treasure Hunt Generator (creates the QR codes and procedures automatically; you just input your text)**
- **Arcade Game Generator (you just input questions and answers)**
- **Classroom Calendars**
- **Breaking News Generator (below)**
- **Many more items**

This is NOT a true newscast; I created this with News Generator (just in case someone misinterprets and gets too excited)
