

## Blockposters.com

I just discovered an awesome little tool this week. Block Posters will allow you to take a .jpg file and produce a poster from it. For those of you who used piktochart or infographics to make an infographic and want to print it poster style, this is the tool for you.

Simply go to [www.blockposters.com](http://www.blockposters.com) and upload your .jpg file. Block posters will span your graphic across several sheets to make a poster size photo. You can then download your .pdf file, which will be several pages of your creation. Tape it together and voilà, you have a poster.

Best of all, it is FREE, FREE, FREE

If you try it, please let me know; I'd love to see your creation !

**Step One**  
Upload your image

**Step Two**  
Slice your image

**Step Three**  
Download your poster!

Block Posters lets you make your own custom posters at home for free.  
Upload an image, choose your options and then download and print out your own  
personalized huge poster!
