

ATL Testing Procedure

Lake Technical College's Accredited Testing Lab (ATL) was approved in 2019. Students enrolled in the Welding Technology and Welding Technology Advanced programs test prior to completion of their program. Individuals who are not students may apply to take a weld test using the following procedure:

1. The ATL Testing form must be completed by the applicant and approved by Welding Instructor, John Dahler.
2. Once the applicant has been approved to test, the signed form must be taken to the Business Office where payment for the test is made. The cost for a single weld test is \$400.00.
3. Testing is scheduled in the Business Office with staff member, Jaliah Maple. The test must be taken within thirty (30) days of payment.
4. The paid receipt and ATL Testing Form must be presented on the day of testing to the evaluator.

Testing will be available every first, third, and fourth Friday*, beginning at 8:30 am. There will only be ten (10) testers allowed per testing date.

Testers must bring a picture ID and check in at the front desk.

For any questions/concerns please contact Jaliah Maple at MapleJ1@lake.k12.fl.us or at 352.589.2250 ext. 1818.
